Group.

Going international is today one of the key levers of growth for French companies. In a world where economies are increasingly integrated and interdependent and where globalised value chains are concerned, it is almost impossible for an SME to become a mid-cap without an external growth strategy abroad (acquisition of market share through the acquisition of a competitor, acquisition, of a specific know-how). This strategy to accelerate development is often preferred to the creation of an entity from scratch.

SODICA Corporate Finance, Crédit Agricole Group's specialist in small and mid-cap balance sheet transactions, supports you through an exclusive targeted purchasing mandate (according to pre-defined criteria with you) with the following objectives:

- Establish contact with the target,
- Negotiate the valuation of the asset purchased,
- Secure all the parameters of the transaction.

AND MORE

- Support for the directors and shareholders of mid-cap and SMEs in their thinking and strategic projects,
- A dedicated team, structured and adapted to the execution of the entrusted mandate,
- Organised management of the acquisition process to preserve confidentiality and negotiate the best legal and financial conditions,
- Coverage of major global geographic areas, notably through partnership agreements between SODICA CF and local investment banks.
