forward within the time of a delivery.

Opt for the Crédit Agricole Group's Foreign Exchange Swap solution.

BASIC PRINCIPLES

- The foreign exchange swap is used to implement early or carry forward the foreign currency's delivery date within the context of a long-term contract.
- It can also be used as a cash management tool for foreign currencies.

How does it work?

- The foreign exchange swap combines two opposing operations (foreign currency purchase and sales) on two distinct dates.
- These two operations are carried out at different rates that reflect the cost or gain in offset within the foreign currency's delivery time.
- This rate differential is known as "swap points".

YOUR NEEDS

The foreign exchange swap is aimed at the importing and exporting businesses.

It is mainly used to carry forward and implement early the foreign currency's conversion.

It can also be used to temporarily generate the cash management in another foreign currency.

BENEFITS

- Shifts over time (make early or carry forward) foreign currency's delivery time.

LIMITS

- The swap points may be in your favour or not in your favour.
 - It is not a currency hedge.
-

EXAMPLE

Early termination of sale

Delayed purchase

AND MORE

With a network of 19 trading rooms around the world , including 5 liquidity centres in London, Paris, New York, Hong Kong and Tokyo, **Crédit Agricole Group gives you control of your exchange rates:**

- by offering turnkey solutions for more than 100 currencies
- by offering you a complete range of products which responds to your needs (simple & complex, coverage and optimisation)
